

ChowBOT
by Meerchant

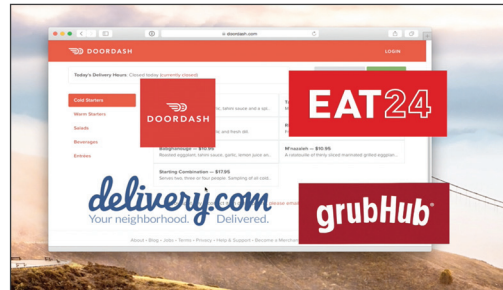

Quickly and Easily Automate All Online Ordering and Delivery, Without Overhead. Visit demo.chowbot.com for Quick Video Demonstration.

Quickly create your own online ordering and delivery site synced with your Clover. Enable your customers to order ahead from their mobile phone or browser and pickup inside, curbside, or have it delivered by our contracted courier partners. Consolidate orders from EAT24, GrubHub and others to a kitchen printer located on the cook line.

Online ordering and delivery without the extra work for you and your staff. Traditional Print & Scan workflow.

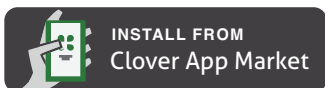

Orders from EAT24, Caviar and others also print to cook line. Automated phone attendant texts ordering link to calling customers.

Reduce commissions to 3rd party sites, such as EAT24, and get paid faster. Payments go directly into your account.

Fully automated: Customer gets mobile text when food is ready. Delivery is scheduled automatically. No extra work for your staff.
