

Cash Track

by Seven Spaces

How Cash Track Works

Cash Track App enables you to track cash out to employees and/or registers. You can count and record the cash, checks at the end of a shift.

RECORD CASH OUT

Record cash you give to employee/register at the start of the shift(s).

COUNT CASH IN

Count & record how much cash/checks you received at the end of the shift(s)

SAVE AND CLOSE

Record money in, cash adjustments and decide where it is stored. e.g. bank, register.

Get Started

The Cash Track app ensures every dollar counts. Track cash given to each employee or register, and count and record the cash and checks at the end of shift.

We created the Cash Track app so restaurants, bars, and retail stores can track in real time the current cash amount out to each employee or register. At the end of the shift, you and your employee can count, reconcile, and record the cash and checks, calculate tips due, and more.

Begin shift, record how much cash assigned to each employee and register

During the shift, monitor current cash on hand for each employee and register

Count cash in, manage cash withdrawals

Save and close, feel confident you are in charge of your cash account
